# DO SOMETHING DIFFERENT

Elevate your event with the timeless elegance of our black-and-white photo booth, a luxurious twist on traditional event photography.

This isn't just a booth; it's a portrait studio that captures you and your guests in high-contrast, monochrome splendor, perfect for weddings, galas, and upscale occasions.

Our black-tie attendant who is also a professional photographer, ensures each guest shines, while our sleek, minimalist setup seamlessly complements your event's aesthetic.

For a more interactive touch, guests can opt for self-click photos guided by our intuitive software. Our innovative AI facial recognition technology makes accessing digital portraits a breeze, allowing guests to find their images in our online gallery effortlessly. As a memorable takeaway, guests can also receive a printed photo on-site and will receive high-resolution digital files taken of just them throughout the event right to their inbox.

Choose us for magazine-quality glamour portraits, a booth that blends with your theme, and custom options to personalize your experience.

As an innovative touch, our booth integrates AI facial recognition technology. Throughout the event, guests can easily access their portraits via our digital gallery. Whether they've posed for multiple shots or candidly joined the fun, finding their pictures has never been easier.
